

MONARCH METALS, INC.
9551 LEMON STREET
VILLA PARK, CA 92861

**FOR LESS THAN 50 CENTS WE CAN GET YOUR
\$15,000.00 LASER SCANNER TO READ BETTER !**

(TEST RESULTS INDICATED IN EXCESS OF OVER 300 DIES SPRAYED PER 4 oz. CAN.)

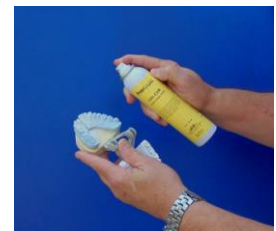

INTRODUCING: MONARCH'S NEW CAD-CAM LASER IMAGE SPRAY

MONARCH'S NEW SPRAY ENHANCES THE READABILITY OF THE LASER LIGHT IN YOUR SCANNER BY REDUCING THE REFLECTIVE PROPERTIES OF YOUR DIE STONE, SCAN STONE OR METAL IMPLANT ABUTMENTS. LESS THAN 10 MICRON PARTICLE SIZE SEPERATES THIS MATERIAL FROM OTHER SPRAYS OFFERED, AND IT'S MICRO-FINE LAYER ASSURES THE USER OF THE BEST POSSIBLE FIT ACHIEVABLE TODAY. CAD (Computer Aided Design) SOFTWARE BRINGS THE LAB TECHNICIAN TO A NEW LEVEL OF ACCURACY AND REPEATABILITY AS LONG AS THE LASER SCANNER CAN PROPERLY READ AND SEND THE MOST ACCURATE IMAGE TO THE COMPUTER. MONARCH'S LASER IMAGE SPRAY ENHANCES THIS PROCESS AT A VERY AFFORDABLE COST TO THE DENTAL LAB. THERE ARE MANY SPRAY PRODUCTS AVAILABLE TO CHOOSE FROM. SOME SELL FOR AS LITTLE AS \$15.00 PER CAN, UP TO THE HIGH-END MATERIALS AT \$220.00. PARTICLE SIZE ALSO VARIES FROM 25 MICRONS UP TO AS MUCH AS 65 MICRONS. AT UNDER 10 MICRONS, OUR SPRAY IS THE FINEST MATERIAL AVAILABLE TODAY.

"THE PROOF IS IN THE FIT"
